

I want to thank Mr. Powell and the FCC Department for creating the "Do Not Call List" for the citizens of the US. My quality of life became much better without the nagging telemarketers' frequent calls. Prior to the list, my family received nearly 12 calls a night, on top of any important calls from family, friends or employment. The State of New Jersey increased that security for my family and me. Please do not reverse this wonderful process. The government is in place to support the little people. We need this list, we need our list. Don't take this security away from us. Are you willing to receive these and many other frequent telemarketers calls? Well, neither do we.
